

High Quality Digital Print Media

DESCRIPTION

13 Mil backlit Film with a unique stiff composition for superb backlit applications. Rigid structure allows for larger print panels. Print receptive top coating allows for printing using a variety of Solvent and Ecosolvent printers.

APPLICATIONS

Excellent print resolution and Ink adhesion. Good durability without overlamine. Lamination is recommended for protection against abrasion or chemical deterioration. Great for Back or Front-lit Menu Graphics, Back-lit Displays, POP Graphics Larger backlit durable display panels etc.

PRINTABILITY

Printable using a variety of Solvent and Ecosolvent printers such as Mimaki, Roland and UV printers

Important: Media should be tested by user for compatibility with their printer and Ink combination
